HAILEYBURY

— PANGAEA —
ONLINE SCHOOL

Balancing sport and academics

Welcome to Haileybury Pangea — Australia's leading private online school and a uniquely rewarding online learning experience.

Backed by 130 years of educational excellence and innovative teaching, Haileybury Pangea allows curious, self-motivated students to receive a world-class online education — one that unlocks all kinds of exciting pathways. Students are free to create their own learning journey, with 2–3 live lessons per subject, per week and the rest of the time spent completing self-paced work around their other passions and out-of-school commitments.

Our brilliant teachers deliver world-class academics based on the Australian curriculum and Australian VCE accreditation, so that students can access an extraordinary range of post-secondary pathways and accelerate their VCE learning. This academic program is delivered through an engaging mix of the latest technology — and is complemented by a social and wellbeing program that encourages students to form friendships and connections, fulfil their potential and grow personally as well as academically.

Excel in your learning and your sporting career

The demands of training, travelling and competing can be tough — but it is possible to excel in your studies alongside your sporting career as well. Haileybury Pangea offers a personalised approach to learning, so you can have more choice over when, where and how you learn.

There are four ways you can choose to study your VCE, whether that's full-time, part-time, by completing single subjects, or following the Northern Hemisphere Timetable (NHT) — if that aligns more seamlessly with your sporting schedule. No matter which path you choose, you will receive real-time feedback from Haileybury Pangea's brilliant teachers at every step, who specialise in online learning and are always on hand to help you thrive in your unique learning journey.

By choosing to take your education online through Haileybury Pangea, you will be giving yourself a world-class head start in your post-sport career as well. Successfully juggling training and competing with learning and growing — so you feel like a winner on and off the field of play, with the academic success to prove it, too.

How sport students are supported

Haileybury Pangea develops individual student pathways for all our high performing athletes by building on their particular strengths and interests in an online setting that is both safe and connected to a larger community. To guide this, we have in place an award-winning Student Wellbeing program that underpins a student's entire learning journey.

For high performing athletes balancing rigorous training with education, our platform delivers support for their holistic growth. Our commitment extends to empowering these students to excel academically while nurturing physical and emotional wellbeing, ensuring they thrive both on and off the field.

This program offers a safe and supportive environment where students can ask questions and be actively involved in discussions around all topics relating to one's wellbeing. It aims to build their emotional intelligence, develop their social skills and acquire an understanding of the society and world they live in. The importance of resilience and how to manage one's ability to move through challenging times and grow from experiences is embedded within the program and extends throughout the broader Wellbeing Program.

Our pathways

YEARS 5-9	YEARS 10-12		
 Australian curriculum	 Full-time VCE	 Part-time VCE	 Single subject (incl. NHT subjects)
The Years 5–9 pathway is designed to cultivate independent high-achieving learners through an environment where exploration, innovation and aspiration are nurtured.	This pathway is designed for students seeking to maximise their academic potential and immerse themselves fully in the vibrant Haileybury Pangea community.	Part-time VCE is a dynamic choice for students who value both academic excellence and flexibility as it allows you to craft a customised study plan.	Single subjects is a pathway designed for those who want to enrich their VCE program and access specialised subjects that may not be on offer at their current school.

Access to examination preparation and academic coaching.

*Students must be enrolled in another home school in order to enrol as a single subject student. They default to a part-time student if Haileybury Pangea will be their home school and they are undertaking three or fewer subjects.

**Students at another school can enrol in a maximum of two single VCE single subjects at one time.

Meet our students

Milo (Year 10)

Milo transitioned to Haileybury Pangea as a full-time student at the start of 2023 from Haileybury's Brighton campus, so he could better balance his snowboarding commitments and studies. Having started snowboarding at the age of eight, Milo has been a familiar face on the Australian, New Zealand and USA slopes. By studying online at Haileybury Pangea, Milo is able to maintain his 30–35 hours a week of training during the snow seasons as well as travelling to compete in competitions around the globe. Through the School's flexible timetable, Milo can stay up to date with his classes and complete his self-paced study in the evenings.

"I have found Haileybury Pangea very good, the teachers are supportive, and the timetable works out great for me. It allows me to train and compete in Australia and overseas."

Oskar (Year 12)

Meet Oskar, a bright young golfing talent, who started golf at the age of seven and has since competed in world-class competitions in both Australia and overseas. Oskar and his family made the decision to move to Haileybury Pangea as a full-time student so Oskar could maintain his focus on his golf career and still complete his VCE. The mix of live lessons and self-paced study allows Oskar to plan his daily training and gym schedule around classes. Upon graduating from Haileybury Pangea, Oskar hopes to attend college in the USA and play Division 1 golf on his quest to become a professional golfer.

"I have found Haileybury Pangea to be very flexible with how the lessons are scheduled, which has helped with the way I schedule my golf practice. The teachers are very flexible when I miss class when I compete in different tournaments and are happy to either meet at a different time or send me through what I have missed."

Lily (OH 2023)

Lily began playing basketball at the age of six and that was the start of a lifelong passion for the sport. As Lily progressed with her basketball career it became apparent that she needed a flexible schooling model to help her meet the needs of both obtaining her VCE and partaking in her elite basketball program. Lily attended a local Secondary School with a condensed timetable that she rounded out by studying a VCE single subject via Haileybury Pangea. Studying single subjects at Haileybury Pangea allowed Lily to continue her high-quality education without sacrificing her sport.

"For each subject there is only one lesson per week with homework clearly laid out and I can contact teachers outside of class times if I have any queries. I can attend training sessions and interstate events because I can access my class from any location."
